1. This opinion contains indications relating to the following items:

- ☒ Box No. I Basis of the opinion
- ☐ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☐ Box No. VII Certain defects in the international application
- ☐ Box No. VIII Certain observations on the international application

2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
☐ This opinion has been established on the basis of a translation from the original language into the following language _____, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
 - a. type of material
☐ a sequence listing
☐ table(s) related to the sequence listing
 - b. format of material
☐ in written format
☐ in computer readable form
 - c. time of filing/furnishing
☐ contained in the international application as filed.
☐ filed together with the international application in computer readable form.
☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

The subject matters of claims 1, 5 and 7 do not appear to involve an inventive step in view of document 1, 2 or 3 cited in the ISR. Documents 1-3 describe a polishing liquid for CMP processes that comprises an abrasive, an aqueous solvent and an additive. The diameters and concentrations of abrasive particles described in claims 1, 5 and 7 would be within an extent that could have been easily conceived of by a person skilled in the art.

The subject matters of claims 2-4 do not appear to involve an inventive step in view of document 1 or 2 cited in the ISR. Documents 1 and 2 describe that an additive such as ammonia is added at 0.01 percent by weight.

The subject matter of claim 6 does not appear to involve an inventive step in view of document 1 or 3 cited in the ISR. Documents 1 and 3 describe colloidal silica as an additive.

The subject matters of claims 8, 14 and 15 do not appear to involve an inventive step in view of document 2 or 3 cited in the ISR. Documents 2 and 3 describe that an insulation film of, for example, silicon oxide is polished.

The subject matters of claims 9 and 10 do not appear to involve an inventive step in view of document 3 cited in the ISR. Document 3 describes two-stage polishing by means of different kinds of abrasives.

The subject matters of claims 11-13 do not appear to involve an inventive step in view of document 1, 2, 3 or 4 cited in the ISR. The matters described in claims 11-13 are described in document 4.

The subject matter of claim 16 does not appear to involve an inventive step in view of document 2 cited in the ISR. Document 2 describes uses of the polisher for various industrial products, and a person skilled in the art could have easily conceived of the idea of using it for
